LEARNING

WHO

Alleviating Suffering

WAY OF BEING

Learning Through Life

- From birth each person strives for understanding – grows and develops – reaches for greater awareness – constructs personal worlds – achieves at least some needs and purposes – invests new patterns of thoughts and feelings – acts to validate these – builds new personal worlds – habituates into stable routines –

(Thomas, Harri-Augstein, 1985)

Learning Through Life

- survives – declines – lives through personal and social crises – adapts – struggles to be reborn – and repeats variations upon these themes. Pairs, families, informal groups, private enterprises and public institutions go through analogous cycles. *The process of action, experience, set backs, growth, death and re-birth is learning.*

(Thomas, Harri-Augstein, 1985)

Learning

**The construction, reconstruction,
negotiation & exchange of
personally significant, relevant &
viable meaning.**

Definition of S-O-L

- Learning is the construction of meaning. Self-Organised Learning is the conversational construction, reconstruction and exchange of personally significant, relevant and viable meanings with awareness and controlled purposiveness. This process forms the personal experience which is the basis of all our anticipations and actions.

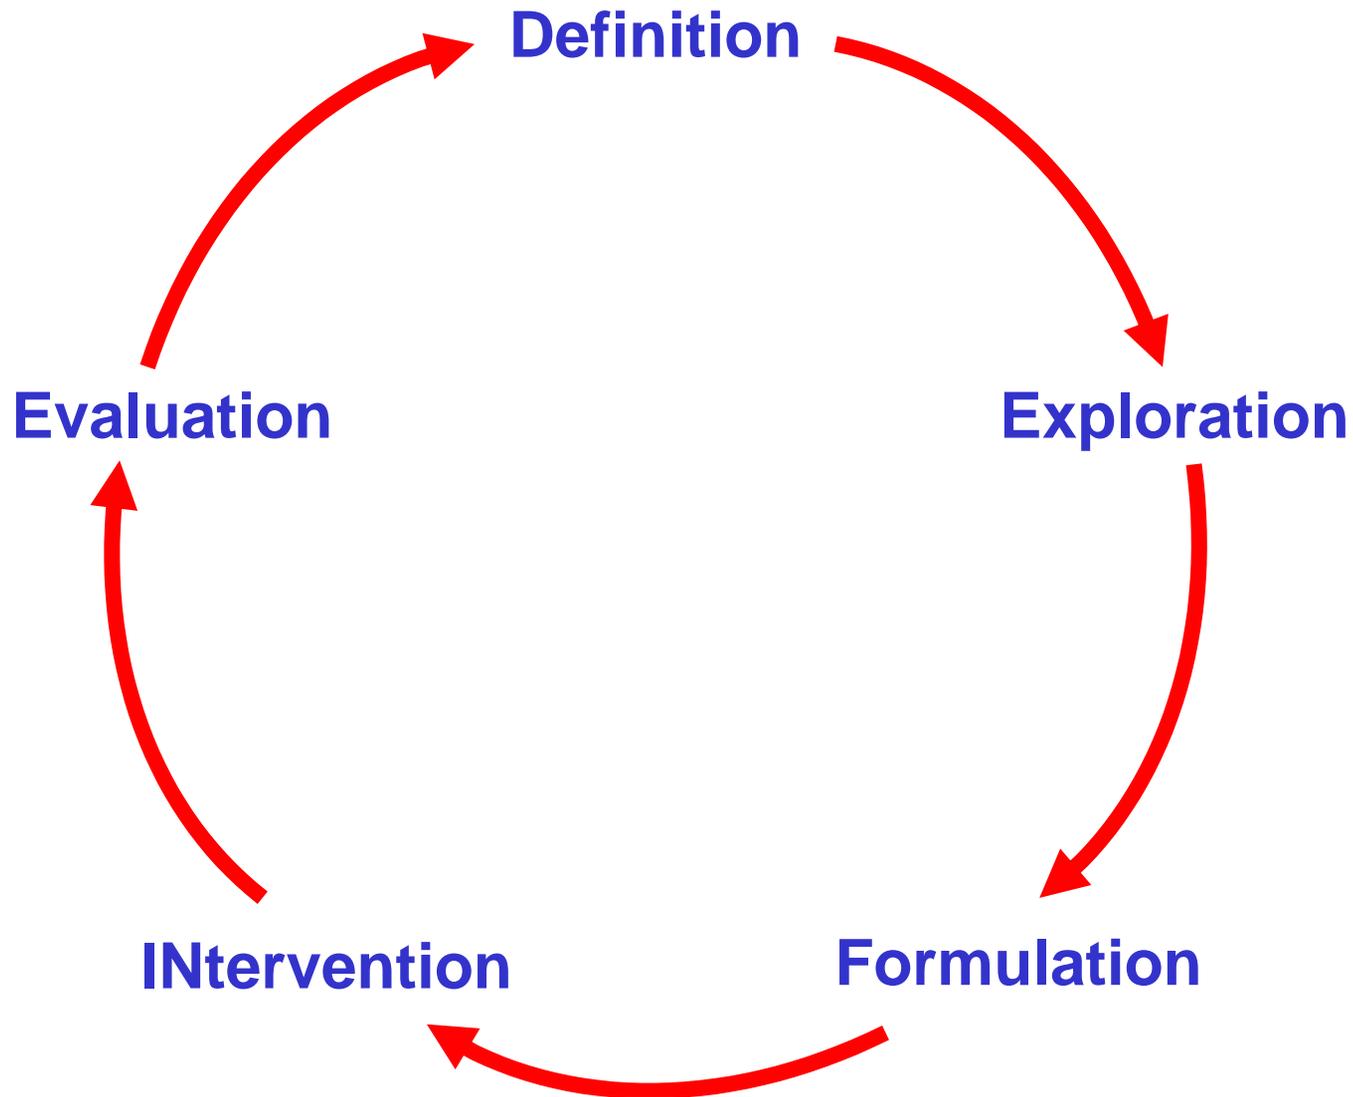

(Thomas, Harri-Augstein, 1985)

Meta Model (DEFINE)

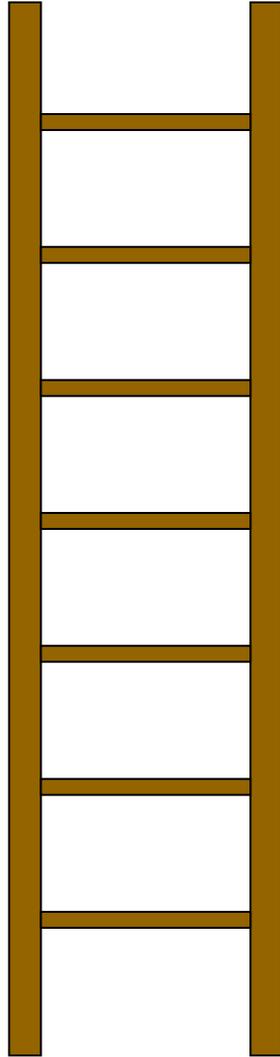

- **Definition** Problem/Issue, Objective & Role to generate a shared concern
- **Exploration** Of factors of influence in context to examine hypotheses of cause
- **Formulation** Of model of “world” a working explanation, to generate intervention hypotheses based on desirable and feasible change
- **Intervention** Plan of action, based on a model, enacted & monitored, structured practice
- **Evaluation** Of the effectiveness, & efficiency of programme, & creation of future objectives

(David Lane, Middlesex University London)

Meta Model (DEFINE)

Ladder of Inference

I take **ACTIONS** based on my beliefs.

I adopt **BELIEFS** about the world.

I draw **CONCLUSIONS**.

I make **ASSUMPTIONS** based on the meanings I added.

I add **MEANINGS** (cultural and personal).

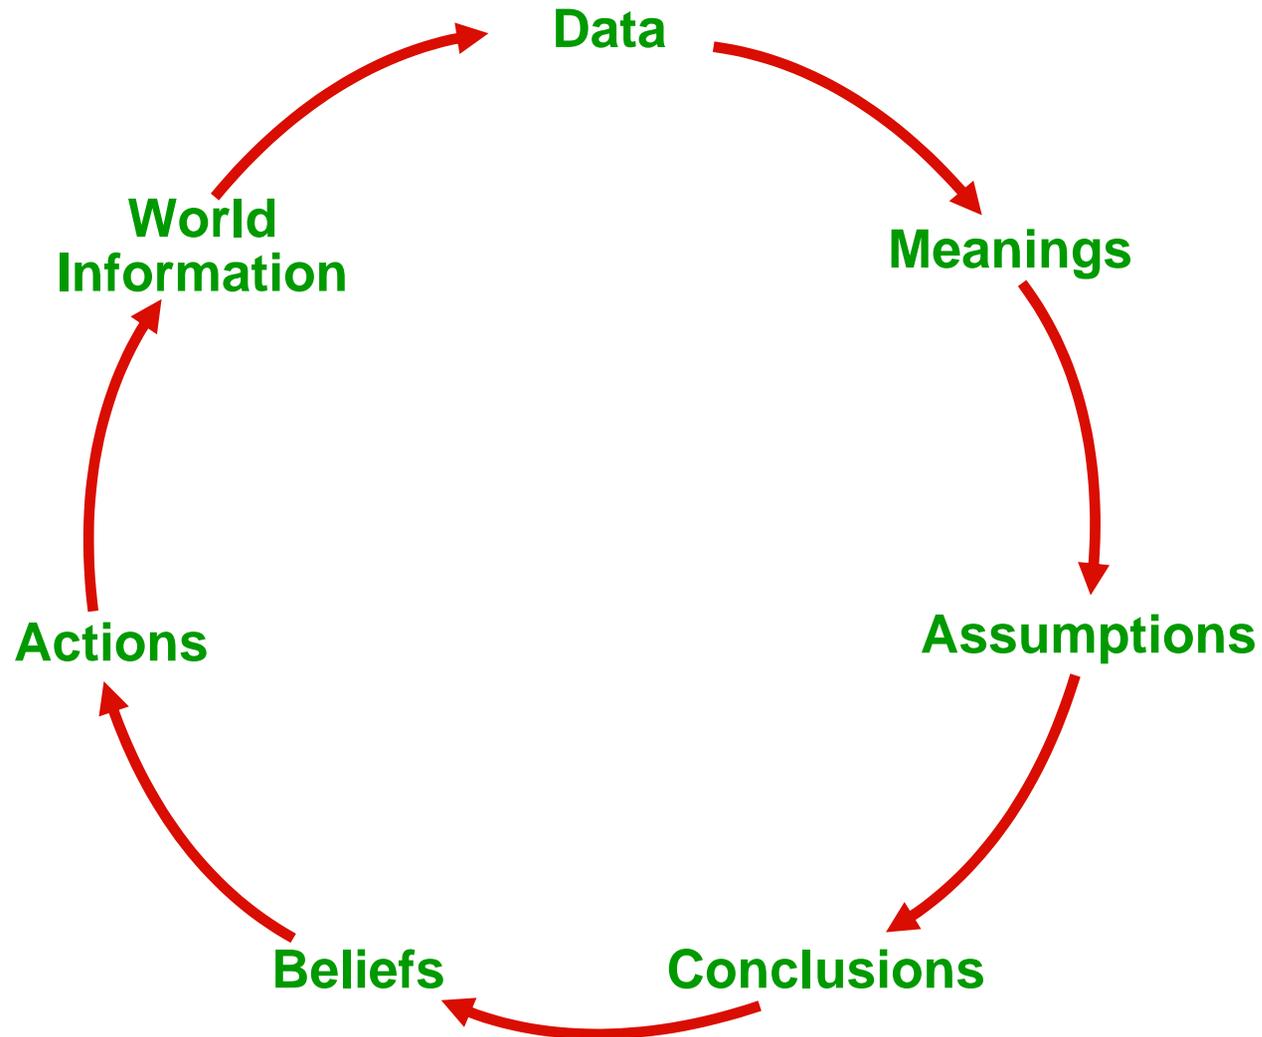

I select “**DATA**” from what I observe.

All the information in the world—observable data & experiences.

NB My BELIEFS affect the DATA that I select.

(Chris Argyris)

Experiential Learning

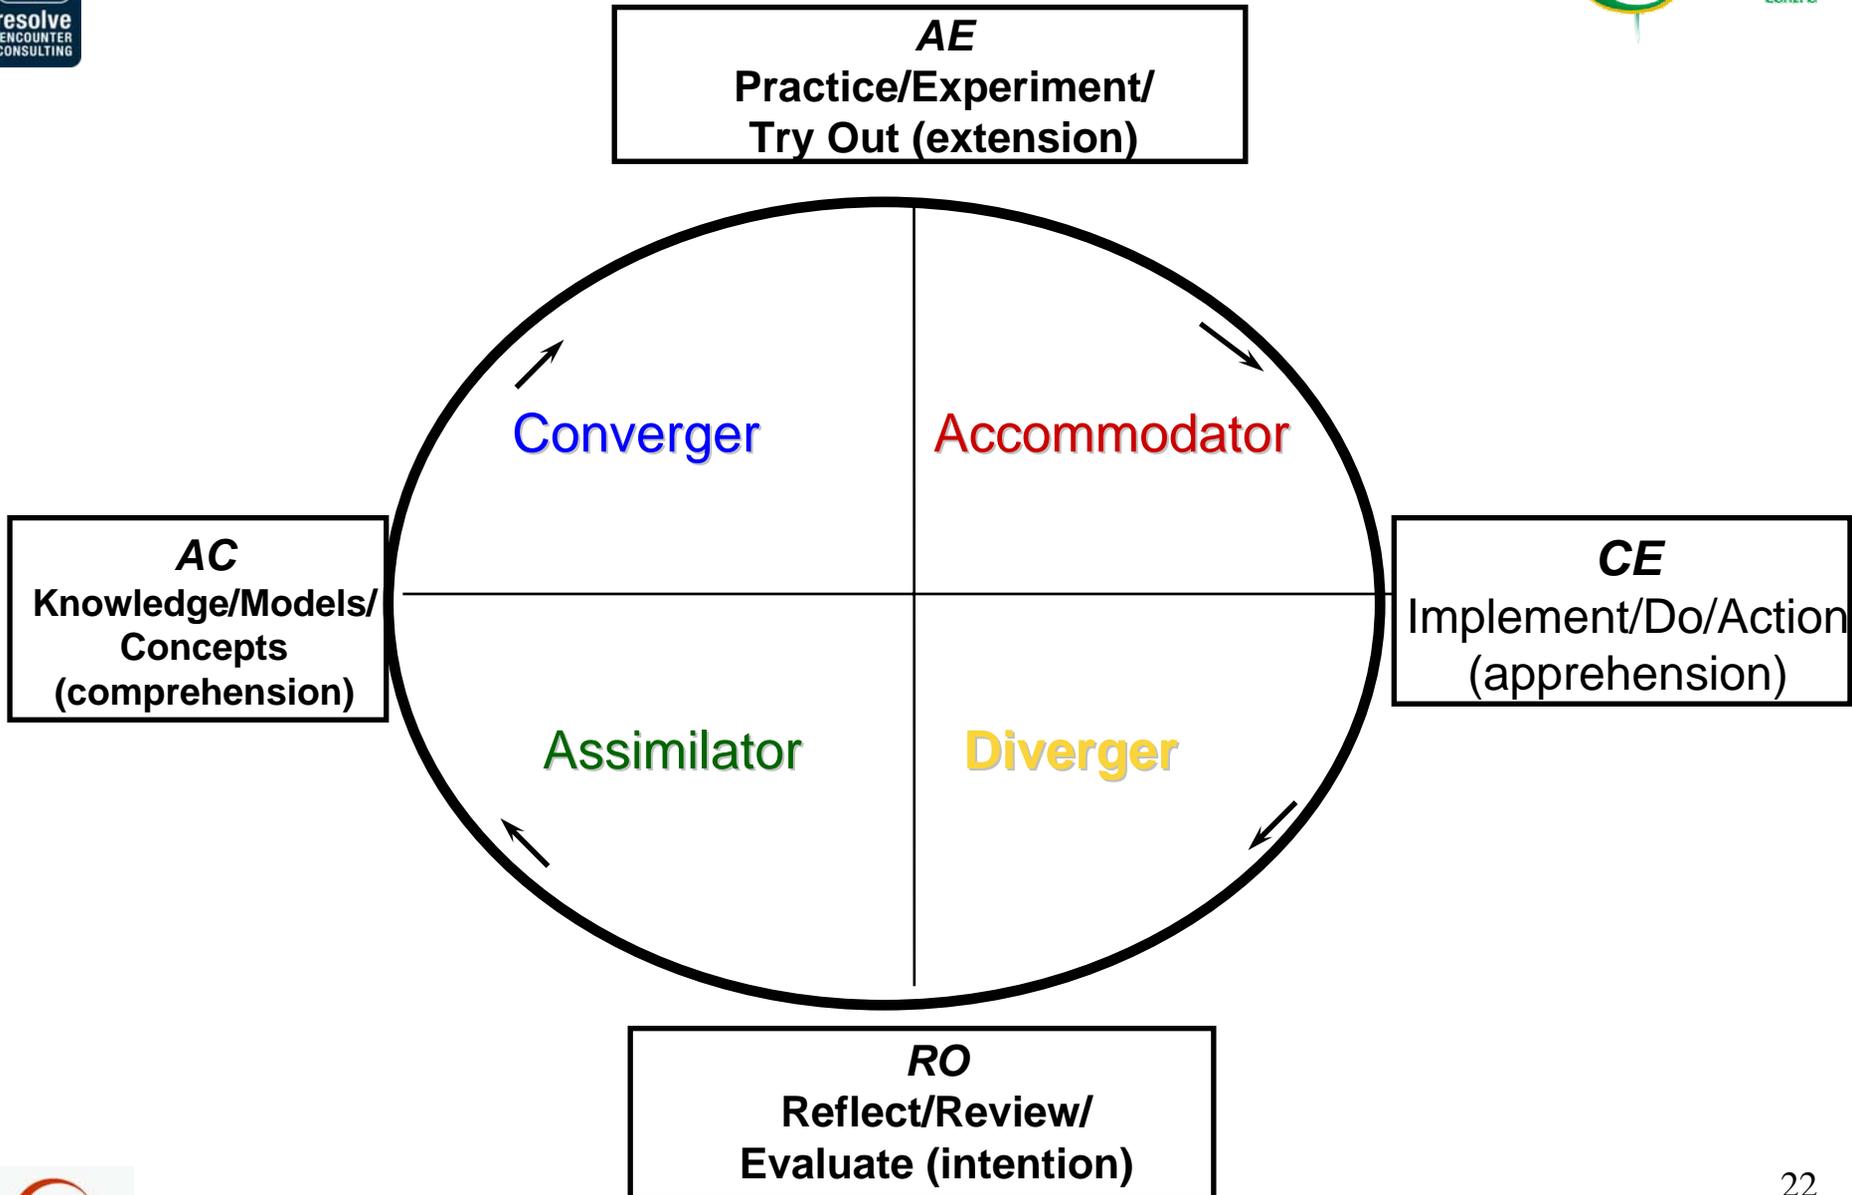

Learning is not just an active, self-directed process, but it is also a process whereby:

“knowledge is created through the transformation of experience”.

KOLB

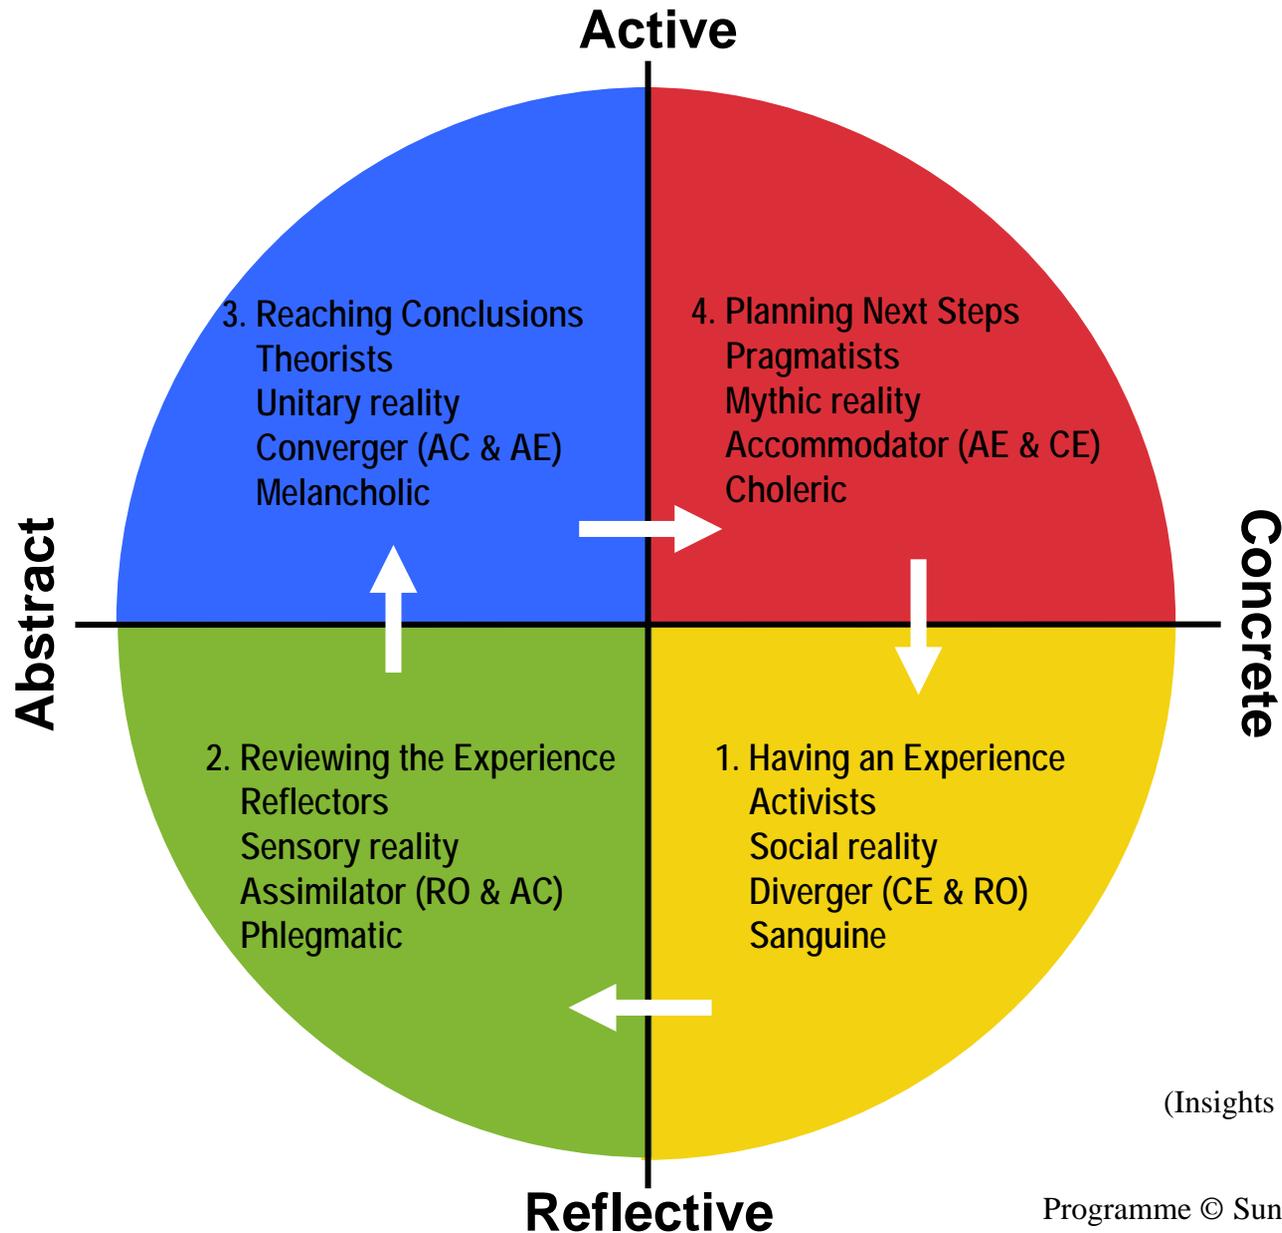

Kolb's Learning Cycle

Insights & Honey-Mumford LSI

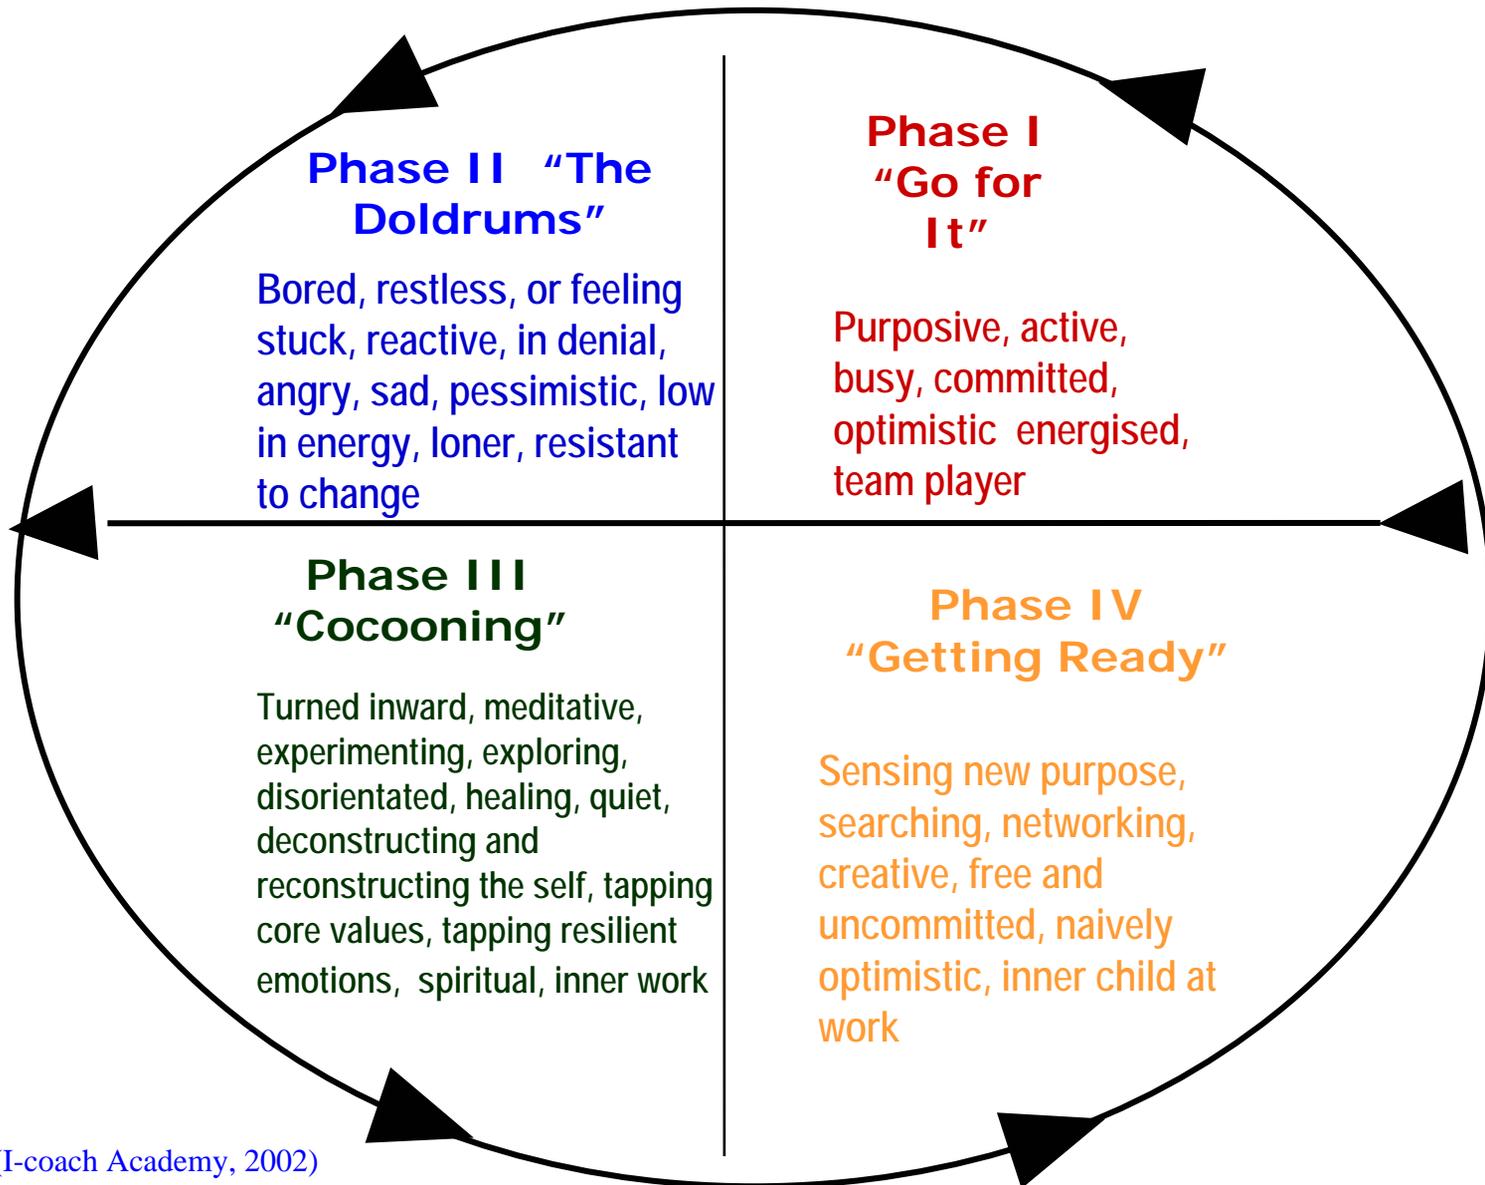

- “Pragmatists try out ideas, theories and techniques to see if they work in practice. They get on with things and like making practical decisions. Pragmatists learn best by planning the next step.”
- “Activists leap into new experiences and fill their days with experiences. Activists learn best by having experiences.”
- “Reflectors stand back, ponder and prefer to think about a problem thoroughly before coming up with their conclusion. Reflectors learn best by reviewing the experience.”
- “Theorists adapt and integrate observations into complex but logical theories. They are the people who develop assumptions, principles, models and systems. Theorists learn best by being able to draw conclusions.”

Degree of Differentiation

The Four Realities of Will McWhinney

My Beliefs Are Most Like:

The Four Realities of Will McWhinney

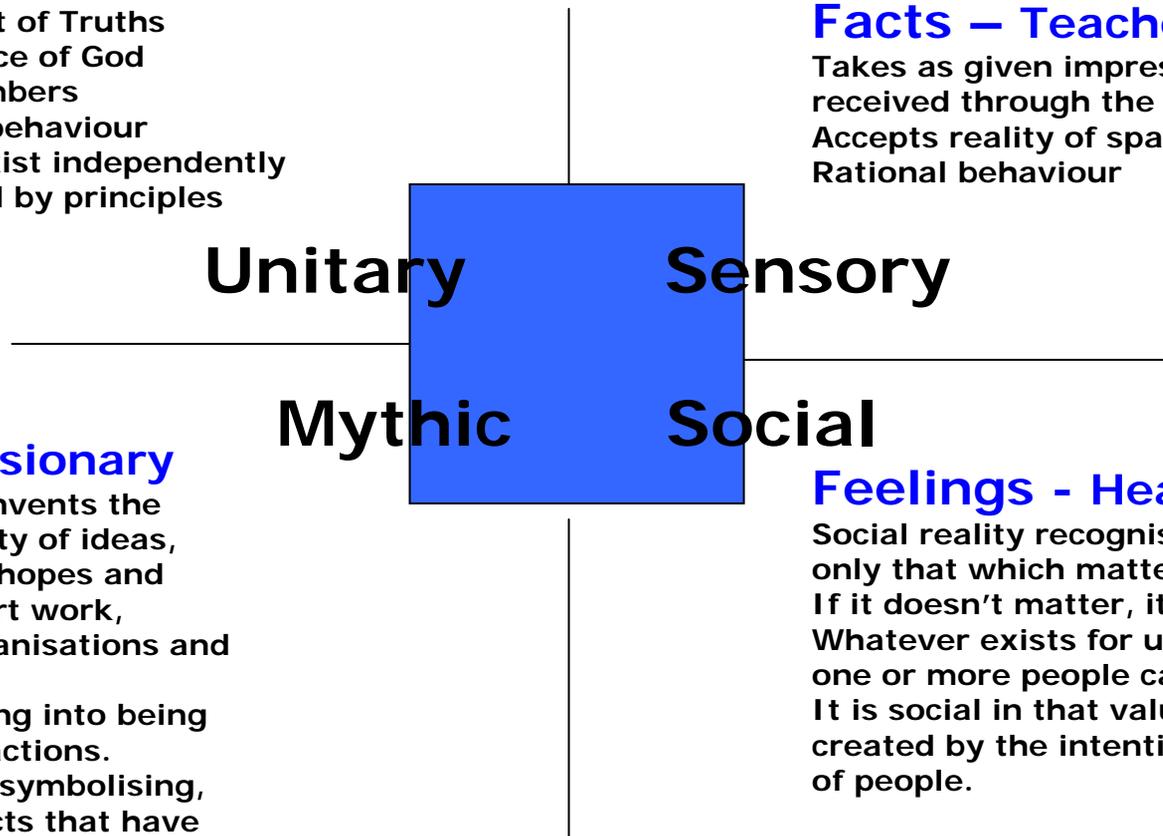

What is most real for you?

Truths – Warrior

Fundamental Set of Truths
 Belief in existence of God
 Science and numbers
 Ethical rules of behaviour
 Things do not exist independently
 They are defined by principles and rules

Facts – Teacher

Takes as given impressions received through the senses
 Accepts reality of space and time
 Rational behaviour

Ideas - Visionary

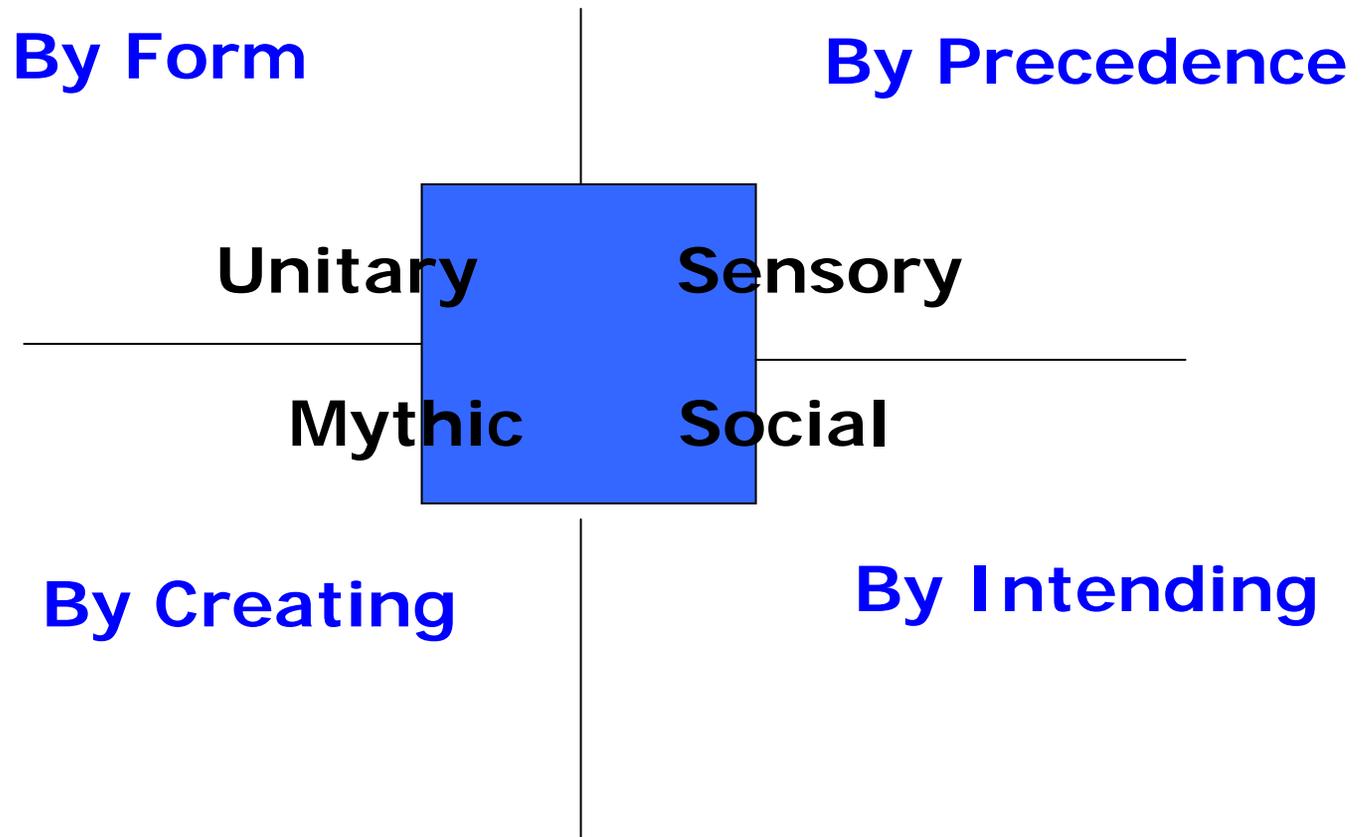

Mythic reality invents the world; the reality of ideas, dreams, plans, hopes and expression in art work, inventions, organisations and cultures.
 Brings something into being by beliefs and actions.
 By naming and symbolising, we create objects that have not been 'seen' before

Feelings - Healer

Social reality recognises only that which matters.
 If it doesn't matter, it doesn't exist.
 Whatever exists for us is created by one or more people caring about it.
 It is social in that values are created by the intentions of groups of people.
